Intro to Computer Organization  
Proofs in Mathematics and  
Computer Science

## SUMMARY

An adept problem solver with SQL, Node, Javascript, Vue, Python, C#, Docker, Linux, Go and R experience. A hard-working individual who thrives in high-pressure situations. My education, career experience, and personal development demonstrate that I am self-driven, someone who can integrate into a team, and I'm constantly finding new challenges to take on. I strive to be the best I can be and I am always looking for ways to improve and optimize processes.

## WORK EXPERIENCE

### **Business Systems Analyst**

June 2018 - Present

Plus Relocation

Minneapolis, MN

- Develop web applications utilizing Vue, Node, Go, and SQL to complete user stories across multiple projects
- Create and automate reports in SSRS as well as Power BI using multiple data sources
- Analyze high-level business requirements and translate them into more detailed user stories, use cases, and other functional requirements documents such as process flows, screen mock-ups, and gap analysis
- Evaluate customer needs/issues, analyze business processes, assist in evaluating alternatives, and determine appropriate solutions
- Identify and assist in resolving issues, questions, and scope/requirements gaps and effectively enable delivery and support of applications

### **Expense Processor Intern**

May 2017 - Aug 2017 & Jan 2018

Plus Relocation

Minneapolis, MN
